

# **THE FUTURE OF OUR PLANET**

ADRIANA Č., 1.E

---

## HISTORY OF OUR PLANET

To understand what problems we are facing we have to see what was it like before

We are the ones that are destroying this planet

We are the ones who are responsible for extinction of many species **and in the future maybe our own extinction**

# WASTE

We are overkilling and overbuying

We don't eat everything we buy

We are throwing away too much still useful things

## OVERKILLING

- There are around 200 million animals killed a day around the world
- More than 72 billion land animals a year
- Just in the US are caught and killed more than 2.7 trillion fish

## OVERBUYING

- 300,000 tonnes of clothes are sent to British landfills every year
- Normal person has around 15 Kg of clothes
- We have around 11 years to change or the clima will drastically change

This Photo by Unknown author is licensed under CC BY-NC.

## THROWING AWAY

- Czech Republic throws away 730 000 tonnes of food every year
- A regular Czech person throws away about 80 Kg of food a year
- Around 800 million people around the world are suffering from hunger while we are out here throwing away 80 Kg of food a year

# THREATS TO HUMANKIND

There should be problems with emigrating because of bad conditions like temperature, water and weather

Global warming

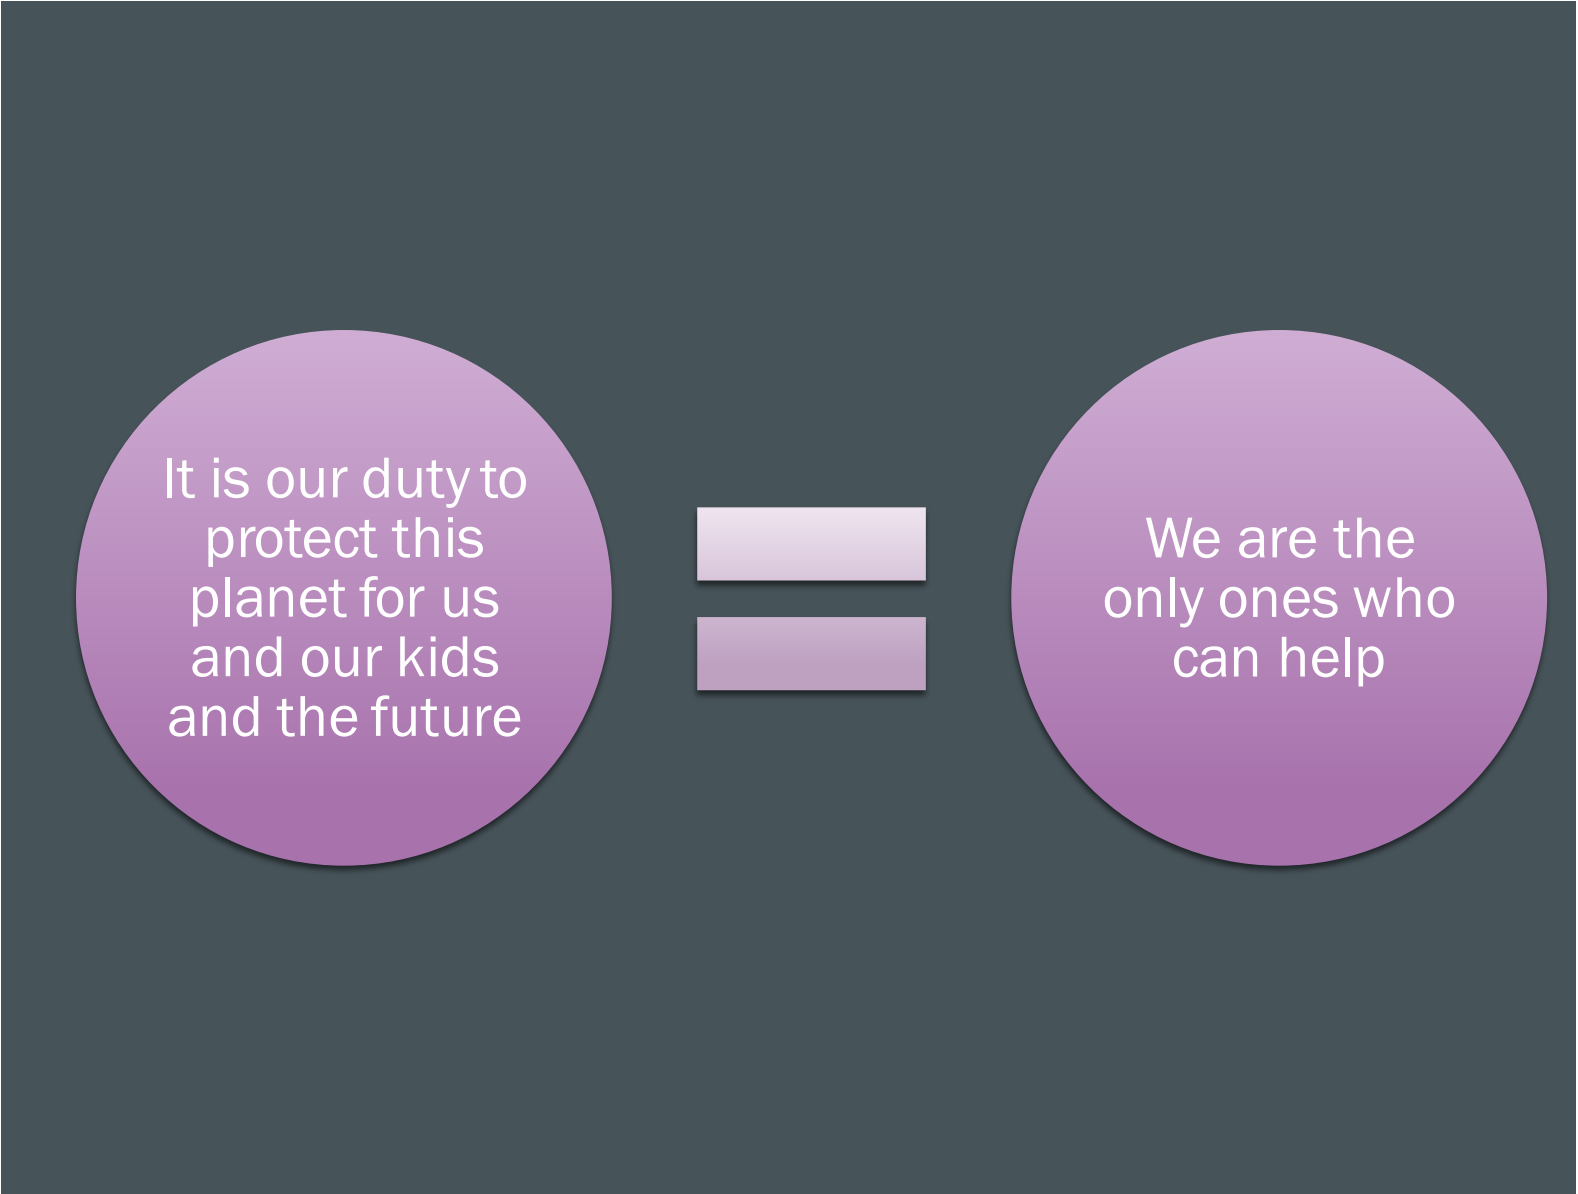

With the sea levels rising the chain of islands like Maledives should be underwater in 30 years

---

## **CHANGE THE WORLD**

It is our duty to  
protect this  
planet for us  
and our kids  
and the future

We are the  
only ones who  
can help

# HOW YOU CAN HELP

Reduce, reuse and recycle

Shop wisely (shop only what you know you will eat)

Save water

Bike and walk more

Don't forget to turn the lights off

Use less plastic (paper shopping bags, reusable bottles)

Stop polluting the water

If you have a house you can plant a tree

**THANK YOU FOR  
READING AND HOPE  
YOU WILL CHANGE  
AT LEAST  
SOMETHING FOR  
THE GREATER GOOD  
OF OUR PLANET**
